Rui Almeida

Senior Android & Kotlin Multiplatform Engineer

eyther.dev · github.com/ruialmeida51 · linkedin.com/in/ruialmeida51

PROFILE

Senior engineer with 7+ years building Android apps and a recent focus on Kotlin and Compose Multiplatform. I own my features end to end, work closely with product and design, and mentor junior engineers through Kotlin Multiplatform internships.

EXPERIENCE

Mindera — Apr 2024 – present

Senior Android & Kotlin Multiplatform Engineer, Sainsbury's — Apr 2026 – present

- Since late summer 2026: moving the codebase to Clean Architecture, MVVM and Jetpack Compose, together with the team.
- Before that: squad building a Kotlin Multiplatform SDK and a native Android app, focused on product discoverability and personalisation.
- Leading Kotlin Multiplatform internships, teaching junior engineers how to build scalable apps.

Senior Android & Kotlin Multiplatform Engineer, Kingfisher Group — Feb 2025 – Apr 2026

B&Q and TradePoint · team of 4 developers and 2 QA

- Built two apps on one shared codebase: domain and data layers in Kotlin Multiplatform, exported as a binary framework for iOS, with native UI on both platforms.
- Maintained a Compose Desktop target as a proof of concept to grow a multiplatform mindset.
- Owned my features, worked closely with product and design, and helped steer technical direction.

Android Engineer, YNAP Group — Apr 2024 – Feb 2025

Net-A-Porter, Mr Porter, The Outnet · team of 3 Android developers and 2 QA

- Shipped features across several apps with full ownership of mine.
- Improved the CI/CD pipeline with GitHub Actions, tackling performance and stability.
- Introduced Jetpack Compose to production and built widgets with Jetpack Glance.

Hole19 — Nov 2023 – Apr 2024

Android Engineer

Team of 4 Android developers and 1 QA

- Helped migrate the app from a legacy view-based MVP architecture to a modern, testable one: MVVM, Coroutines, Flow and Compose.
- Contributed to design decisions and worked on Wear OS.

Mindera

Feb 2019 – Nov 2023

Android Engineer, Waitrose 2021 – Nov 2023

Groceries app · team of 6 Android developers, 1 QA and 1 QAE

- Worked directly with the client and owned my features.
- Moved XML layouts to Compose, introduced the Navigation Component, and replaced RxJava with Coroutines and Flow.
- Migrated CI/CD from a locally run Jenkins to Bitrise: faster builds and far fewer failures.

Android Engineer, Smartbox 2019 – 2021

Team of 3 Android developers and 1 QA

- First real project: applied internship learning to a live, real-world app, coordinating features with design and product.

Android Intern Feb – Aug 2019

- Built an internal Android app from scratch for employees to manage their own information, from scheduling vacations to updating profiles.

PROJECTS

Plannot (Android & iOS): sports club management for schedules, rosters, attendance and invitations. Kotlin and Compose Multiplatform.

Mr. Weble: web studio building sites for small businesses, run in partnership with my girlfriend.

Loom (open source, Android): an app I designed and built on my own, covering architecture, Compose UI, testing and deployment.

EDUCATION

Degree in Software Engineering, 2016 – 2019
